

Code:

```
from collections import Counter
import re

text = """
Python is a programming language.
Python is easy to learn.
Data science uses Python for data analysis.
"""

text = text.lower()

words = re.findall(r"\b[a-z]+\b", text)

frequency = Counter(words)

print("Word Frequency:")

for word, count in frequency.items():
    print(word, ":", count)
```

Output:

```
